

# The fair hotspot management system

Mobile internet with HOTSPLOTS – secure and flexible

## ABOUT US

### Present

First, the internet made the world global. Next, the internet was made mobile by WLAN. Now, HOTSPLOTS lets everyone provide internet access to their customers, guests or visitors – easily, reliably and securely.

HOSPLOTS has relentlessly pursued the goal of providing the ideal billing system for your hotspot since its inception in 2004. Fulfilling this goal day in, day out is what makes our clients so satisfied.

## VISION

### Future

The constantly growing number of hotspot users shows: internet access via WLAN is increasingly important for ever more locations. In this technically and legally dynamic market, the innovative specialist HOTSPLOTS is a strong partner.

Ongoing optimisation is a HOTSPLOTS strength. It lets us continuously extend our leading market position and sets the course for the future.

## SERVICES

### Simple, fair & transparent

This is our guiding principle for approaching our clients and business partners. HOTSPLOTS is for everyone seeking to upgrade their location with a WLAN hotspot. Simple, secure and adjustable to diverse usage scenarios and individual requirements.

### A complete system – many possibilities

This means:

- Minimum investment and effort, **maximum security and functionality**
- Individual solutions: do you want to implement HOTSPLOTS as a free service or generate revenue? Do you want to use your hotspot privately or for commercial purposes? Maybe both? You decide!
- Full control: you determine the conditions under which your WLAN can be used.

## TECHNOLOGY

### Security & quality that comes from experience

The widely tried and tested billing solution from HOTSPLOTS is not least successful due to our comprehensive know-how and extensive software development experience.

HOSPLOTS sets standards for operating ease, service and security. Through active VPN routing, all users of your hotspot surf the internet with a HOTSPLOTS IP address.

This way, your IP address is hidden. In case of misuse of your hotspot, all traces lead to the HOTSPLOTS VPN servers. You as the operator are invisible. With HOTSPLOTS, you will always comply with the currently valid legal requirements.

# The HOTSPLOTS model

## HOTSPLOTS Biz

**More service and satisfaction for your guests – our economical professional solution for you**

## HOTSPLOTS FreeRate

**Free internet access for your guests – maximum comfort with minimum costs for you**

## HOTSPLOTS Partners

**Our partners are not only specialists for WLAN technology but also for first-class service**

### Your benefits:

1. Simply use your existing internet connection or order an internet connection directly from HOTSPLOTS.
2. You enjoy highest security standards.
3. You deliver a top-level service that sets you apart from your competitors.
4. Tickets and online rates can be combined as desired.
5. You decide the rate for your hotspot and generate additional revenue – or offer the service free of charge. Naturally, you may change the rate at any time or switch between pay-for-use and free options.
6. Tickets can be sold to cash purchasers.

Place your trust in onsite specialists that possess precisely the know-how your network requires. We attach great importance on ensuring our partners share the same high quality standards as HOTSPLOTS.
