

Hotspots for Bus & Coach Operators

Simply secure, fair, flexible

Mobile internet and thrilling entertainment with HOTSPLOTS

Want to provide your passengers with an additional service that makes your operation even more appealing? Are you looking to equip your fleet with up-to-date technology enabling easy and secure wireless access to the internet? Would you like to stand out from your competitors by offering your guests a diverse range of media options that will also help enhance your bottom line? Then make the choice for the HOTSPLOTS mobile WiFi solutions: HOTSPLOTS Internet and HOTSPLOTS Entertainment. You also benefit from more than ten years of experience and innovation, which have made our company one of Europe's leading mobile communications providers.

Our powerful systems prove their value each day in many fields, such as restaurants and hotels, tourism and events, bus and rail transportation as well as libraries and shopping centres, to name just a few. HOTSPLOTS sets standards for operability, reliability and security – making it the perfect partner for your needs.

HOTSPLOTS lets you provide passengers with the latest flexible internet and entertainment services – while on the move at top speed, almost everywhere. The benefits for you and your customers include:

- Wireless internet access during journeys
- Full legal protection against abuse of the hotspot thanks to HOTSPLOTS VPN routing
- A comprehensive media library featuring the latest movies and series (also available offline)
- A customisable login page that may incorporate your individual corporate design
- Flexible control and evaluation of internet usage metrics

HOTSPLOTS allows you to enhance the level of comfort for anyone travelling in your vehicles, provides your passengers with significant added value and also makes you stand out from your competitors.

Simply secure – VPN routing

HOTSPLOTS ensures that you are fully protected against any potential legal infringements that users of your WiFi hotspot may commit. With VPN routing we have specifically developed protection to enable the worry-free operation of hotspots by our clients.

All data traffic is directed via the VPN server and the operator's identity is substituted with the IP address of hotspots GmbH. This innovative technology means that you are effectively protected against legal proceedings and other consequences due to user abuse of your hotspot.

Security for you

The statutory regulations concerning the operation of a hotspot, such as, e.g., data privacy, data retention or interfaces for telecommunications surveillance, vary from country to country and are subject to constant changes. HOTSPLOTS takes care of all necessary adjustments on your behalf, in the background. This means that you will be operating a WiFi hotspot in full compliance with the prevailing legal requirements at all times.

A hotspot with potential

Depending on the package you choose, your passengers will initially be forwarded to either a customisable login page or media portal. The login page lets your passengers access the internet swiftly and easily. It also opens up diverse marketing opportunities for you, such as the incorporation of your logos or slogans, product information or company promotions. Should you have also decided on HOTSPLOTS Entertainment, passengers will first be directed to the media portal from where the media content can be used – even in situations when the internet connection happens to be offline. From here your guests will reach the login page for direct internet access via a link. Naturally, the media portal can also be customised in accordance with your corporate design or include special information such as time-tables. Your passengers will therefore experience a diverse range of services within a clear-cut, uniform complete package.

The HOTSPLOTS Entertainment package

Information and entertainment is provided throughout the journey with the HOTSPLOTS Entertainment package allowing your passengers to enjoy a wide choice of film – on any standard smartphone, tablet or laptop. Use of the entertainment facilities is independent of having an actual internet connection. This ensures it remains available to passengers even in instances where no internet connection happens to be available. With this premium added value service for your passengers, you help turn every journey into a real experience.

Everything under control

With HOTSPLOTS, you'll always have a clear overview of costs. Hotspot usage data can be evaluated to allow you, for example, to anticipate future demands of surfing volume more precisely. Should you wish even more control, you may also limit the duration users can be online or the permissible volume of data. You therefore retain an overview of the acceptance and effectiveness of your hotspot at all times.

Powerful hardware

To integrate all the outlined services into your fleet, we exclusively use hardware that has been specifically developed and is certified for the particular demands and deployment in vehicles such as buses and trains. Fitting your vehicles with internet from HOTSPLOTS is inexpensive, simple and provides modern wireless entertainment for your passengers. We would be delighted to discuss additional information regarding our hardware personally.

Your benefits:

- An additional premium service for your passengers.
- A clear differentiation to the services provided by your competition and a powerful USP for your company.
- Fulfilment of all legal requirements concerning telecommunications and data protection legislation, thereby providing comprehensive protection against any legal action in the case of abuse by users.
- Inexpensive and easy installation.
- HOTSPLOTS can provide mobile data rates on your behalf, if desired.
- Trouble-free, convenient management of your hotspot and fully automated invoicing.
- Automatic monitoring of your hotspot functionality.

Passenger benefits:

- Easy and convenient surfing on the personal smartphone, tablet or laptop - contract free.
- Direct access to information and offers from your company. (timetables, promotions, etc.)
- (Optional) access to a comprehensive media library with a full range of current movies, series and music. (Also available offline.)

Take the step to the future now

It would be our pleasure to provide you with an individual proposal. Thanks to our powerful hardware and diverse charging structure, we can offer maximum flexibility at very inexpensive rates.

Find out more by giving us a call or sending us an email so that we can advise you individually.
