## Congratulations from Bosch and HOTSPLOTS

on the purchase of your new Bosch Coach MediaRouter. In cooperation with HOTSPLOTS, you are just a few steps away from using your mobile hotspot to provide wireless internet and entertainment to your passengers. Do you want to upgrade your fleet with up-to-date technology enabling easy and secure wireless internet access? Do you want to stand out from your competitors by offering your guests exciting mobile entertainment options that will also help improve your bottom line? Then choose HOTSPLOTS mobile internet and HOTSPLOTS entertainment.

Every day, our powerful solutions add value in areas as diverse as restaurants and hotels, tourism and events, coach and rail transport as well as libraries and shopping centres or even ski resorts. HOTSPLOTS sets standards for operability, reliability and security, making it the perfect partner for your needs.

# HOTSPLOTS basic package

## Paid internet access for your passengers

With the pre-installed HOTSPLOTS basic package, you are ready to provide secure and convenient paid internet access to your passengers. You need only activate your hotspot at [hotspots.de](https://hotspots.de) and insert a data SIM card into the Bosch Coach MediaRouter – that's it.

You now can sell volume or time restricted Wi-Fi tickets to your passengers or they can choose one of many prepaid options using their free-to-register HOTSPLOTS account on our website. Using VPN routing, HOTSPLOTS ensures that you are protected against potential legal infringements that users of your Wi-Fi hotspot may commit and takes care of all necessary adjustments on your behalf so that you always operate a Wi-Fi hotspot in full compliance with the prevailing legal requirements.

### Features

- Paid internet access via ticket or user login
- HOTSPLOTS VPN redirects all generated data traffic through our servers, camouflaging the operator's identity
- Customisable login page with a convenient drag and drop editor
- Detailed data usage and other statistics
- Support hotline and remote troubleshooting
- Revenue sharing

# HOTSPLOTS plus package

## Free internet access for your passengers

### Features

- Free internet access for your passengers
- Access via ticket or “OneClick login”
- All features of the basic service package are included (VPN routing, customisable login page)
- Optional time or volume restricted access
- Protection against unauthorised free internet usage

Do you want to offer your passengers free internet access with additional services that makes your operation even more appealing and easy with “OneClick login”? Then choose our plus service package. With the plus service package you can provide free internet access to your passengers by simply accepting our terms and conditions, or using a free voucher code.

With HOTSPLOTS, the hotspot usage data can be evaluated to enable you, for example, to anticipate future demands in network traffic more precisely and change your mobile data packages accordingly, if necessary. In addition, you will obtain an overview of the use and effectiveness of your hotspot at all times.

# HOTSPLOTS

## additional services

## HOTSPLOTS entertainment

### Features

- HOTSPLOTS entertainment USB stick
- International movie blockbusters<sup>1</sup>
- Episodes of current TV series<sup>1</sup>
- Music channels of various genres<sup>1</sup>
- Content is updated by HOTSPLOTS
- Digital magazines and newspapers
- Content is stored locally – less additional data traffic is generated

Our entertainment solutions let you provide your passengers, guests, clients or visitors with exciting up-to-date media content on any standard smartphone or tablet PC – via our stationary or mobile hotspots. All digital content is stored locally on the HOTSPLOTS entertainment stick and streamed locally. With this innovative technology, less additional data traffic is generated when using HOTSPLOTS entertainment.
