WiFi solutions for local public transport operators
Professional WiFi solutions for vehicles

More and more local public transport companies are benefitting from our professional WiFi solutions for buses and trains throughout Europe. We use hardware specially designed and certified for use on vehicles. From the external antennas for LTE and GPS reception en route through to the routers, we provide you with the latest equipment to fit out your fleet with WiFi technology easily and securely.

Flexibility and security
With HOTSPLOTS WiFi solutions, you can offer rapid and flexible Internet access to your passengers. You decide how you want to enable access: free of charge and unlimited or with volume or time restrictions. HOTSPLOTS offers flexible solutions for all aspects of access control and extensive evaluation of Internet use.

HOTSPLOTS Telemetry

HOTSPLOTS Telemetry offers a basic service for fleet management of your vehicles. You can use it to monitor the locations of your vehicles and the routes they cover, while measuring the quality of your provider’s mobile wireless connection on your routes.
One platform for all areas of application

At a glance

Calls for bids from local transport authorities increasingly require WiFi to meet the needs of passengers. Internet access is planned not only for new vehicles but also for modernisation.

For the transport companies themselves, it is often a matter of acquiring new passenger groups while remaining an attractive provider for existing passengers. WiFi has therefore already become part of the standard equipment. Both in local public transport and in long-distance travel, the demand of passengers for a flexible Internet service is correspondingly large.

From hardware through to the retrofitting of vehicles, HOTSPLOTS supplies a multitude of solutions that can be combined flexibly. Talk to us about hardware solutions that cover stationary and mobile services, integration of public and private networks in one piece of hardware or real-time information on your login page.

Advantages of HOTSPLOTS WiFi for vehicles

- **A variety of conditions** under which your hotspot can be used – you decide.
- **Entertainment** – You can choose from various media services.
- **Security through VPN routing** – Protects against misuse of data and provides a content filter.
- **Legal security** – You always meet all of the legal requirements with HOTSPLOTS right across Europe!
- **Keep an eye on everything** – Thanks to HOTSPLOTS Telemetry, you have an easy fleet monitoring system at your disposal.
- **Flexible and scalable** – Our WiFi systems can be fitted in almost any vehicle and can be extended as required.
- **All-round service for you** – On request, we can provide a complete package including data tariff.
- **Easy and fast** – Convenient administration of your hotspot and fully automated billing.
Continuous network

With its standard modules, HOTSPLOTS already offers a complete single sign-on solution, within the framework of which users can log on again seamlessly at all hotspots that are set up for this function. It makes no difference whether the individual hotspot is a stationary application (e.g. at a bus stop, in the station or the travel centre) or a mobile application on the bus, tram or train, as HOTSPLOTS supports hardware platforms for all areas of application.

HOTSPLOTS can help carriers with compiling the data and legally compliant adjustment of the conditions of use. In consultation with our external Data Protection Officer, scenarios can be put in place in which the compiled data can be made available to the operating company, if necessary with the prior consent of the user on the login site.

Films, TV, magazines – innovative & attractive entertainment services

Good entertainment with the services of HOTSPLOTS Media: the media are made available locally on the system, can be accessed offline and have hardly any impact on the data volume.

HOTSPLOTS Cinema – Great cinema for your passengers

Using the mobile hardware in combination with the HOTSPLOTS media stick and the HOTSPLOTS app, your passengers have the “Made in Hollywood” entertainment services on their own devices.

HOTSPLOTS Press – Digital newspapers and magazines

With HOTSPLOTS Press, your passengers have access to the latest digital newspapers and magazines. The digital media are loaded directly to the devices with no additional app.

HOTSPLOTS TV to go – The best TV entertainment

Load popular TV programmes, films, series, shows, news and documentaries directly over WiFi from the router to the app on your own mobile phone or tablet – that’s what HOTSPLOTS TV to go has to offer.

HOTSPLOTS Tourist Info – Your digital tourist guide

Offer your passengers regional services such as events, excursion tips for the immediate area, restaurant and hotel recommendations and weather reports.

Sounds interesting?
We look forward to hearing from you and would be happy to advise you.
