

City Rendezvous

WiFi solutions for towns,
cities and communities

A photograph of a young man and woman smiling and posing together in an urban setting. The woman is wearing a straw hat and a red top, and the man is wearing a black leather jacket over a white shirt. They are both looking towards the camera.

Easy, secure & flexible The first choice for WiFi

Everything under one roof

HOTSPLOTS has been operating as a WiFi provider in Germany and Europe since 2004, with more than 15,000 active hotspot locations. The service for towns and municipalities range from equipping libraries and town halls to covering entire inner city areas. HOTSPLOTS is always there to help you: we deal with the planning of the wireless network and advise you on the design of an overall system that meets your requirements.

Our own technicians or those of one of our partner companies will handle the on-site installation and look after the system while it is running. If there are problems, our customer and end-user support is there to help.

WiFi4EU

From 2018, the European Union is supporting new hotspots in towns, municipalities and rural communities with the WiFi4EU funding programme. Municipal and public institutions will receive support.

HOTSPLOTS supports towns and municipalities throughout Europe as a registered provider. We offer you:

- Advice and support in planning WiFi and choosing hardware
- Security through VPN routing
- On request, provision of the necessary Internet connection

Flexibility and security

Using HOTSPLOTS WiFi solutions, you can offer rapid and flexible Internet access to the residents and visitors in your area.

You decide how you want to enable access:

- **Direct-Login** - free of charge, through simple acceptance of the conditions of use,
- **User-Login** - by registering with hotspots.de or
- **Ticket-Login** - on the basis of tickets (vouchers).

User access can be restricted in time or by a maximum data volume, as you prefer.

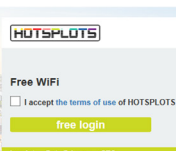

HOTSPLOTS offers flexible solutions for all aspects of access control and extensive evaluation of hotspot use.

Free WiFi Guests welcome

HOTSPLOTS

Your visiting card
City marketing

Your logo

individual offers, information, pictures

First impressions count!

Take the opportunity to design your own front-end landing page. In this way, you can integrate your hotspot actively into city marketing and strengthen the perception of your area. Guests and visitors also have the latest news about the various options in your region on the landing page.

A simple editor is available for this purpose. You can also promote yourself as a city, region or provider by customising the login screen. This includes not only displaying your logo but also adding your own images. Direct links to your website and references to regional events can also be included on your login interface. The HOTSPLOTS login page is multilingual.

Log in once – use WiFi throughout the entire city

With HOTSPLOTS WiFi services, you can combine several individual hotspots to create a hotspot network with our roaming function. Users make use of the same login options and surfing conditions for example in the public library, the town hall, the old town or the railway station. Our auto login function means that the user does not have to log in again at each hotspot in the roaming group.

Legal requirements & data protection

HOTSPLOTS complies with the respective country-specific requirements for WiFi providers. These affect amongst other things telecommunications requirements and data protection issues (GDPR).

We will make all necessary adjustments to the legal requirements for the operation of a public WiFi hotspot.

This ensures that your WiFi hotspot always meets the latest legal requirements.

HOTSLOTS Media - The perfect addition for your location

Extend your municipal WiFi with entertainment services from HOTSLOTS Media. These additional services are available locally on your hotspot.

HOTSLOTS
Tourist Info

HOTSLOTS Tourist Info – Your digital tourist guide

With HOTSLOTS Tourist Info, you can offer your visitors a high-quality tourist information portal covering the whole of your region – with no extra work or cost for you. Services such as events, excursion tips, hiking and cycle paths and weather information are provided directly via your hotspot. You can also customise the portal.

HOTSLOTS
Press

HOTSLOTS Press – Digital newspapers and magazines

With HOTSLOTS Press, your visitors have access to the latest newspapers and magazines. The digital media can be downloaded directly to a smartphone, tablet or notebook with no additional app. Your visitors can take the magazines with them after they have been downloaded and continue reading them even outside the range of your hotspot.

Advantages of HOTSLOTS WiFi

- **A variety of conditions** under which your hotspot can be used – you decide.
- **Security through VPN routing** – Protects against the legal consequences of misuse of data.
- **Legal security** – HOTSLOTS centralizes and meets all of the legal requirements.
- **Flexible and scalable** – Our WiFi systems adapt to your needs.
- **All-round service for you** – On request, we can provide a complete customised package including data tariff.
- **Easy and fast** – Convenient administration of your hotspot and fully automated billing.
- **Mobile solutions** – Create connections to hotspots on your municipal transport system.

Sounds interesting?

We look forward to hearing from you and would be happy to advise you.
